ANNUAL REPORT OF "M" PROJECT¹

Introduction.- In accordance with the directive our data were selected on a world-wide basis.

The material, which was distributed in the form of Reports, Translations, Memoranda, and Administrative Series, totalled approximately 4,000 double-spaced stencilled pages.

In addition, special maps were drawn and photographs and photostats were included to illustrate certain texts.

Direction.- Dr. Isaiah Bowman has conducted Staff Conferences throughout the year to establish and maintain circumscribed objectives. From time to time he requested special desiderata.

Mr. John F. Carter issued a monthly check for all operations.

Operations.- Although "M" Project was approved from November 1, 1942, no funds were available until the end of December, 1942.

The total amount received from November 1, 1942-December 31, 1943, was \$39,052.32.

1. This supplements, but does not duplicate, the previous Report dated May 5, 1943, together with the Exhibits thereto attached.

Increase in Funds.- Two budget increases were requested and approved during the year.

Since the research staff began to produce more copy than the secretarial staff could handle, it was desirable to add to the Staff and to engage part-time workers with O.S.S. security.

Monthly Reports.- Dr. Isaiah Bowman and Mr. John F. Carter have received monthly progress reports throughout the current year.

Staff.- The work was divided into research, translation, editorial work, typing and stencilling, and proofreading.

During 1943 the regular staff included seven members with three secretaries. In addition, there were nine specialists who were employed on specific assignments. The Staff members and specialists are fluent in seventeen languages, several of them reading fluently five or six languages.

This language facility enables cross-references to be made, which often lead to valuable conclusions not otherwise obtainable.

The Staff consisted of the following:

1. Mr. Robert Strausz-Hupé directed the greater part of the research, planned assignments, coordinated results and supervised and revised final draft of all Staff Reports. He was in charge of the Archive on Migration and Settlement and through his many colleagues he obtained documents for copying and manuscripts on loan. Reads German, French, and Italian.

2. Dr. Sergei Yakobson planned and directed all research on the U.S.S.R. His excellent bibliographical knowledge, particularly of the Library of Congress where he is Consultant in Slavic History, has been invaluable. His numerous colleagues both here and in New York have assisted the work to a great degree. He has been instrumental in borrowing (often for our stencilling and dissemination) many restricted and confidential manuscripts not previously available to the Government. Reads Russian, German, French, and Polish.

3. Dr. Gottfried Solomon-Delatour worked mainly on North and East Africa and France. His many colleagues have been extremely helpful in obtaining data. Reads German, French, and Italian.

4. Dr. Stephen T. Possony worked part-time on Europe, especially Germany, Italy, Spain, and France. Reads German, French, Spanish, and Italian.

5. Dr. Anthony F. Balasy worked on South America and East Africa. Reads Hungarian, German, French, Spanish, and Italian.

6. Mr. Isadore Dordick worked on U.S.S.R. and Manchukuo. Reads German, Spanish, Russian, Yiddish, Hebrew, Dutch, Polish, and Swedish.

7. Dr. K. S. Yum worked on a Report on the Koreans. Reads Korean, Japanese, and Chinese.

8. Dr. Robert M. W. Kempner prepared the Administrative Series. Reads German and Italian. He was unpaid by "M" Project.

9. Mrs. Robert M. W. Kempner assisted her husband. Reads German and Italian.

10. Mr. Gerald Haxton worked part-time on the French Report and translated and edited the ICA Report by Mr. Oungre. Reads French, some German.

11. Mrs. Edward T. Lampson was editor-in-chief, correcting copy and proofreading. Reads Spanish, French, German, some Italian and Czech.

12. Miss Elizabeth Beverley gave secretarial assistance to Dr. Balasy and worked mainly on South America and East Africa. Reads Spanish and French. Now working as editorial assistant and researcher.

13. Mrs. J. G. Dunn, working part-time on "M" Project, kept the accounts and did typing, stencilling and proofreading.

14. Miss Mary Frinsko acted as secretary to Mr. Strausz-Hupe and in charge of Security of Study Rooms 114, 115 and 116 in the Library of Congress Annex. Reads some Russian, Ukrainian, and Polish. Studying French.

15. Mrs. Willie R. Prostov worked part-time on "M" Project as typist, stenciller, and proofreader.

16. Miss Tekla Powlack began secretarial work on November 22. Reads some Ukrainian and is studying Russian.

17. Mr. Eugene Prostov translated on an hourly basis Russian reports, mainly on recent agricultural developments. Reads Russian, Bulgarian, French, Georgian and other Slavic languages.

18. Mr. Samuel Kutcheroff translated and prepared a report on immigration laws in East Africa.

19. Mr. J. Whitla Stinson, formerly in the Department of State, worked during December on South America and East Africa, with concentration on the legal aspects of immigration.

20. Mrs. Carry Hepner, also on an hourly basis, translated from the German and summarized articles on migration and settlement.

21. Mrs. Emily Ericcson prepared a Report on Angola, using mainly Portuguese sources.

22. Stencilling was done during weekends on an hourly basis by Miss Mayree Emerine, Mrs. Elizabeth D. Secrest, Miss Catherine Pepe, Miss Virginia Renshaw, and Miss Elva E. Ruppel--all of O.S.S., therefore each with security check.

23. As overtime work Mr. L. H. Dgiczkowski and Mr. J. Becker, both of O.S.S., prepared original maps and copied others.

24. The following secretaries worked on a temporary basis: Mrs. W. E. Norman, Miss Dorothy Threlkeld, and Mrs. Hazle Collins Fowley.

25. Miss Marion Burkard worked during the latter part of the year as messenger, courier and manual assistant.

Secretarial Assistance.- The secretarial staff, working perfectly as a team and often under the severe strain of taking copy from temperamental linguists, achieved remarkable success.

The care, accuracy and speed of the stencil-cutting (4,000 stencils) was of an exceptionally high degree.

Several rush orders were completed on time under considerable pressure.

Their loyalty, willingness, skill and patience contributed to success of the Project.

Editorial Work.- The general plan was to produce reports which are read with relative ease. For example, special 20 lb. KVP mimeograph paper was used, double spacing with short paragraphs and wide margins was followed, and pica type was selected.

The planning and arrangement of the Staff Reports were directed by Mr. Robert Strausz-Hupé, who wrote all the Summaries.

The editorial style followed the University of Chicago system, with minor modifications.

Mrs. Edward T. Lampson was appointed editor-in-chief and was mainly responsible for editing and proof-reading copy.

Mrs. Prostov, Mrs. Dunn, Miss Beverley, and Miss Frinsko also read proof from time to time.

Recorder.- Mrs. Dunn kept the records and accounts in excellent condition, despite changes in personnel and in tax regulations. Reads French and Spanish.

Security.- Each employee was checked by O.S.S. Security and an Oath of Office administered after the

pertinent sections from the Espionage Act had been read. These data are on file in O.S.S. Security.

In the few cases where employment was temporary, each employee upon leaving was cautioned about the secrecy of "M" Project and reference attention was drawn to the Oath of Office taken freely after reading Sections 31 and 32 in the Espionage Act.

During the past year the secrecy of "M" Project has been completely maintained even in the face of most eager questioning. The fact that so many documents and manuscripts have been placed at our disposal without any possible showing of authority, indicates in no small degree the skill with which the Staff Members have handled delicate situations with tact and persuasion, having no authority.

We hope to be able to continue to work behind the seven veils of secrecy, but those remaining are becoming slightly diaphanous!

Travel.- To conform to Government requests, the traveling of Staff Members was reduced to the practical minimum, especially during the second half of the year.

Publications.- Books and pamphlets were purchased when necessary for ready reference. Inter-library loans and, in some cases, photostats were used. However,

book buying was discouraged until other methods had failed, unless the need was urgent.

Staff Expenses.- These include petty cash disbursements, supplies, telephone and postage--all of which were maintained near the efficiency level.

Property.¹- Books, pamphlets, manuscripts, Russian newspapers, maps, photographs, photostats, etc.

Three 4-drawer steel files with combination locks.

Three typewriters (secondhand).

Archive of Reports and notes on Migration and Settlement arranged by continent.

Liaison.-1. Upon authorization, Mr. John Franklin Carter arranged interviews with Mr. Paul Appleby, Mr. Wayne Chatfield-Taylor and Governor Lehman. Mr. Carter has supervised the general operations of "M" Project.

2. Captain F. Gilman Spencer was appointed by Brigadier General Hayes Kroner as Liaison Officer from G2 to "M" Project. He has been exceedingly helpful in circulating our Reports with G2. We furnish him with a copy of catalogue cards of recent war books as soon as they are available. This service has proved useful to G2.

1. A list of books, pamphlets and manuscripts appeared as Exhibit F in our Report of May 5, 1943.

3. Dr. Diamond Jenness, our liaison representative in Canada, has obtained manuscripts, books, and statistical data for us.

4. Dr. Alfonso Caso, our liaison representative in Mexico, will be invited for a conference with the Staff in the near future. It was not considered advisable to invite him to Washington until some time had elapsed following the First Demographic Congress held recently in Mexico City.

Conferences.- 1. These were held during the year in G2, ONI, A2, and in Departments of Agriculture, Commerce, State, and Justice.

2. Dr. Isaiah Bowman met with us every few weeks during the year to comment on Reports and outline directives for our work. These conferences have been particularly stimulating.

3. Weekly Staff Conferences have been held since Labor Day, so that the programme can be discussed in detail, and good teamwork results.

Assistance Received.- 1. Through the Librarian of Congress, Study Rooms 114, 115, and 116 have been placed at our disposal. Special library facilities have been granted to the Staff.

2. The Office of Strategic Services has mimeographed about 120,000 pages, the special paper being supplied by "M" Project. Several thousand photographic prints were also made in the O.S.S. Reproduction Division. Other facilities, such as new Royal typewriters, have been placed at our disposal. Stencils have also been supplied by O.S.S.

3. Generous cooperation was received from the Department of Agriculture where Carol B-6 has been reserved for the use of our Staff. Special library facilities have also been made available.

4. The Staff has also benefited from assistance and conferences in the Department of Agriculture, Department of Commerce, and in the Office of the Coordinator of Inter-American Affairs.

5. The following have rendered generous assistance: Mr. Wayne Chatfield-Taylor, Mr. Paul Appleby, Mr. Frank Waring (CIAA), and Mr. Maurice Barber (Commerce).

6. Colleagues and friends of Staff members have placed at our disposal unpublished manuscripts which we have been granted permission to copy and disseminate to our very limited list of recipients.

Work in Progress.- Several Reports and Memoranda dated in December, 1943, will be distributed in January. The following are nearing completion:

1. The Staff is preparing a summary of conclusions

drawn from the past year's investigations. This should form a tentative "Blueprint for Settlement."

2. A study of settlement and settlement possibilities in Abyssinia, Kenya, Uganda, Tanganyika, Rhodesia, and Mozambique is nearing completion. It is proposed to consolidate these reports into a survey of White settlement in the East African Highlands. The reports will each contain an analysis of recent legislation affecting immigration, and attitudes of local population groups.

3. Dr. Louis Oungre, for 25 years Managing Director of ICA, was interviewed by a member of "M" Project. He courteously replied to a questionnaire prepared by "M" Project and volunteered information concerning the practices of his organization. A compilation of Dr. Oungre's views on settlement and a critical analysis of ICA's experiences will soon be completed.

4. The Staff is preparing a summary of sections of a report of the Corps of Engineers, U.S. Army, on the Orinoco-Casiquiare-Negro Waterway, bearing upon the suitability of this region for settlement.

5. The Staff is now engaged in preparing a summary of the conclusions drawn from the past year's investigations. It is expected that this report will be completed during January.

6. A translated summary of an exhaustive study by Dr. H. Lautensach of the two Korean islands, Dagelet and Quelpart, will soon be stencilled.

7. Reports on Angola (220 pp.), the Negeb (60 pp.), the Pontine Marshes (85 pp.), Dagelet and Quelpart Islands (25 pp.), Decrees regarding the Rehabilitation of the liberated Ukraine (50 pp.), and notes on Palestine (20 pp.) are awaiting stencilling and dissemination.

8. Reports on France, East Africa, South America, U.S.S.R., Korea, and Manchukuo are in various stages of completion.

9. Two large Reports will be distributed next week:

a. Coöperative Resettlement by Henrik Infield (450 pp.).

b. Documentation on Soviet Colonization Policy by Staff Member Jakobson. This will be about 250 pp.

10. The following Memoranda will be available shortly:

a. Greek Refugees in the Belgian Congo.

b. Selection for Coöperative Rural Settlements.

c. Relocation of Japanese-Americans.

d. Colonization in Peru.

e. Rehabilitation in Ecuador.

f. An Economic Pioneer Land Settlement Policy in Canada.

Dissemination List.- The most restricted documents were sent to Miss Tully and to Dr. Bowman.

The general list included in addition: State (2), Agriculture (8), Commerce (2), Library of Congress (2), CIAA (1), O.S.S. (2), G2 (3), O.N.I. (1), A2 (1), Army Specialized Training Program (1), and School of Military Government, Charlottesville (1).

Special Information.- 1. Members of the Staff were consulted by G2, OSS, ONI, State, Justice, OQMG, OFFRO, and National Research Council.

2. The target objective of Nauru was recommended to ONI. Target objectives in Germany have also been sent to ETO.

3. At the urgent request of the Navy Department, Dr. Stephen T. Possony was given permission to work on a secret project which has been eminently successful. This unit has consulted the Staff almost daily.

4. Mr. O. John Rogge, Department of Justice, consulted with several Staff members on data connected with the trial of George Sylvester Viereck and the sedition case now in secret session.

5. Because of the secrecy of "M" Project, the knowledge of our work has been restricted to the minimum number as approved.

6. Mr. Richard E. Harrison, cartographer for Fortune, supplied Mr. Strausz-Hupé with an advance copy of his paper entitled "The Nomograph as an Instrument in Map Making," Geographical Review, Vol. 33, 1943, pp. 655-657.

Mr. Harrison authorized me to submit his device to the Navy Department and the War Department. Mr. Strausz-Hupé was accorded interviews by Colonel Poole and Colonel Fitzgerald of the Cartographic Section and the Army Air Force respectively. He was asked to furnish a brief description of this new method of constructing map grids.

Colonel Fitzgerald expressed his interest in this device and Colonel Poole showed it to the Coast and Geodetic Survey, U. S. Navy. Mr. Harrison advised him that Colonel Fitzgerald, as well as the Coast and Geodetic Survey, have prepared samples of his nomograph and were considering adapting this device.

Commendations.- Verbal reports and letters have been received that part of our work has been of value to all recipients on dissemination list.

Future Recommendations.- Upon completion of the Final Report next month with the collaboration of Dr. Bowman, we shall probably make some recommendations.
